Preface	v
List of Notation	xiii
Introduction: The Tale of the Mori Program	1
1 Birational Geometry of Surfaces	9
1.1 Castelnuovo's Contractibility Criterion	10
1.2 Surfaces Whose Canonical Bundles Are Not Nef I	21
1.3 Surfaces Whose Canonical Bundles Are Not Nef II	36
1.4 Basic Properties of Mori Fiber Spaces in Dimension 2	42
1.5 Basic Properties of Minimal Models in Dimension 2	51
1.6 Basic Properties of Canonical Models in Dimension 2	75
1.7 The Enriques Classification of Surfaces	83
1.8 Birational Relation Among Surfaces	88
2 Logarithmic Category	109
2.1 Ititaka's Philosophy	110
2.2 Log Birational Geometry of Surfaces	118
3 Overview of the Mori Program	129
3.1 Minimal Model Program in Dimension 3 or Higher	131
3.2 Basic Properties of Mori Fiber Spaces in Dimension 3 or Higher	141
3.3 Basic Properties of Minimal Models in Dimension 3 or Higher .	153
3.4 Birational Relations Among Minimal Models and Mori Fiber Spaces in Dimension 3 or Higher	155

3.5	Variations of the Mori Program	161
4	Singularities	163
4.1	Terminal Singularities	164
4.2	Canonical Singularities	168
4.3	Logarithmic Variations	173
4.4	Discrepancy and Singularities	179
4.5	Canonical Cover	183
4.6	Classification in Dimension 2	191
5	Vanishing Theorems	250
5.1	Kodaira Vanishing Theorem	251
5.2	Kawamata–Viehweg Vanishing Theorem	259
6	Base Point Freeness of Adjoint Linear Systems	268
6.1	Relevance of Log Category to Base Point Freeness of Adjoint Linear Systems	269
6.2	Base Point Freeness Theorem	272
6.3	Nonvanishing Theorem of Shokurov	279
7	Cone Theorem	286
7.1	Rationality Theorem and Boundedness of the Denominator . .	286
7.2	Cone Theorem	297
8	Contraction Theorem	301
8.1	Contraction Theorem	301
8.2	Contractions of Extremal Rays	306
8.3	Examples	309
9	Flip	317
9.1	Existence of Flip	318
9.2	Termination of Flips	322
10	Cone Theorem Revisited	324
10.1	Mori’s Bend and Break Technique	325
10.2	A Proof in the Smooth Case After Mori	330
10.3	Lengths of Extremal Rays	332
11	Logarithmic Mori Program	338
11.1	Log Minimal Model Program in Dimension 3 or Higher	338
11.2	Log Minimal Models and Log Mori Fiber Spaces in Dimension 3 or Higher	342
11.3	Birational Relations Among Log Minimal Models and Log Mori Fiber Spaces	345

12 Birational Relation among Minimal Models	349
12.1 Flops Among Minimal Models	350
12.2 Chamber Structure of Ample Cones of Minimal Models	358
12.3 The Number of Minimal Models Is Finite (!)	363
13 Birational Relation Among Mori Fiber Spaces	368
13.1 Sarkisov Program	369
13.2 Termination of the Sarkisov Program	392
13.3 Applications	399
14 Birational Geometry of Toric Varieties	413
14.1 Cone Theorem and Contraction Theorem for Toric Varieties . .	413
14.2 Toric Extremal Contractions and Flips	425
14.3 Toric Canonical and Log Canonical Divisors	442
14.4 Toric Minimal Model Program	447
14.5 Toric Sarkisov Program	449
References	455
Index	469
